Leyland Trade

About us

Leyland Trade offer a core range of quality, affordable trade paints that you can rely on for a job well done. This expertise is built through our longstanding heritage - we've been making paint since 1922.

Product features key

- Apply with roller
- Apply with brush
- Apply with spray
- Apply with trowel
- Suitable for interior use
- Suitable for exterior use
- Suitable for interior & exterior use
- Available to tint

Product features

WATER BASED

Water based paints in this booklet have minimal/very low VOCs (Volatile Organic Compound) and are easily recognised by their very low odour and quick drying properties.

- Water based paints are sometimes referred to by customers as:
- Acrylic paints
 - Quick drying paint
 - Low odour paints

SOLVENT BASED

Solvent based paints in this booklet have high/very high VOCs which are released into the atmosphere as the paint dries. Solvent based paints are easy to apply, tough and durable.

- Solvent based paints are sometimes referred to by customers as:
- Alkyd based
 - Traditional paint
 - Oil based
 - Spirit based

Leyland Trade

Light Reflectance Value (LRV)
LRV is a measurement that tells you how much light a colour reflects. Visual contrast is achieved by differences in LRV. To meet the requirements of the The Equality Act, the Building Regulations Part M recommends a minimum of 30 points between colours on adjacent critical surfaces (e.g. floors/walls). A wall colour with a higher LRV can also support sustainable lighting plans by helping to propagate daylight into a space and reduce the amount of lighting required.

Health & Safety The Health and Safety at Work Act 1974 places a responsibility upon manufacturers and suppliers of substances for use at work to ensure, so far as is reasonably practical, that they will be without risk to health when properly used. Suppliers are also required to provide users with information on the nature of any hazards of the materials supplied, together with recommended precautions for their safe use. Please refer to the Health and Safety Data Sheets.

Waste & Product Disposal Purchase only the correct amount for the job to be carried out by using the coverage rate given on the product container. Scrape as much product as possible from equipment before cleaning. Use only the minimum amount of cleaner and re-use as often as possible. Ensure container is re-sealed fully after use. Store in a cool, dry, frost free place. Contact your local authority regarding disposal of wastings and waste paint. Do not empty product into drains or watercourses.

Lead in Previously Painted Surfaces Special precautions should be taken during surface preparation of pre-1960's paint surfaces over wood and metal as they may contain harmful lead. For further advice contact Technical Advisory.

Further Information We have produced the colour shown on this colour card as accurately as printing will allow. Please ensure you use a tester pot before decorating as a colour can appear very different depending on the lighting available and the room and surface where it is being used.
